

Web Development Internship Assignment: LearningShala

Project Title: IIM Sirmaur Online MBA Landing Page Development

Objective

To build a high-performance, responsive, and conversion-optimized landing page for the **IIM Sirmaur Online MBA in Data Science & AI**. The page should be designed to capture leads and provide all essential program details clearly.

The Brief & Content Requirements

Your landing page must include the following sections and specific demo data:

1. Hero Section:

- **Headline:** India's First AI-Native MBA for Working Professionals.
- **Sub-headline:** Earn an MBA degree from IIM Sirmaur without quitting your job.
- **CTA:** "Download Brochure" or "Apply Now" (Sticky Button).

2. Program Features:

- 100% Live Online Weekend Classes.
- Direct IIM Alumni Status.
- 24-Month Duration with Campus Immersions.
- Specializations: AI-Powered Finance, Marketing, and Operations.

3. Eligibility & Important Dates:

- **Eligibility:** Bachelor's Degree (50%+) + Min. 2 Years Work Experience.
- **Application Deadline:** 31st July 2026.
- **Contact for Queries:** +91 98765 43210.

4. Lead Generation Form:

- Fields: Name, Email, Phone Number, Current Designation, and Experience.

Technical Specifications

- **Tech Stack:** You are free to use **HTML/CSS/JS, React, or Next.js**.
- **Responsiveness:** The page must be "Mobile-First" and fully responsive across all devices.
- **Performance:** Aim for a high Google PageSpeed score (optimize images and code).
- **Design:** Maintain a clean, premium "Executive" look using IIM-compatible colors (Navy Blue, White, and Gold accents).

Submission Instructions

Please ensure you submit the following to **eklovey@learningshala.in** within **48 hours**:

1. **Live Link:** A link to the hosted landing page (Vercel, Netlify, or GitHub Pages).
2. **Source Code:** A link to your **GitHub Repository** (ensure it's public or access is granted).
3. **Subject Line:** Web Dev Intern Assignment - [Your Name]

Evaluation Criteria

- **Code Quality:** Is the code clean, modular, and well-commented?
- **UI/UX:** Is the navigation intuitive and the call-to-action prominent?
- **Speed:** Does the page load quickly without layout shifts?
- **Precision:** Are all the provided demo details (Contact, Eligibility, Dates) accurately displayed?

Note: We are looking for developers who understand that a website is a marketing tool. Your ability to balance technical efficiency with a great user experience is what will get you shortlisted!
